labs over 120,000 sq ft of space.

RELIANCE LIFE SCIENCES

A part of the Mukesh Ambani-led Reliance Group, clocking estimated biotech revenues ₹693 crore for fiscal 2011-12, growing at CAGR of 52 percent over the past five years and having a total employee strength of 803 people, RLS has grown from strength to strength since it first commenced operations back in 2002. Recalls KV Subramaniam, president and CEO, Reliance Life Sciences, "People could never believe that Reliance could operate in the life sciences space. But we have been successful and our achievement has been that we have always kept the innovation engine growing within RLS." The challenge at that time was finding the right set of competencies and building a strong and sustainable business."Today we have reached a stage Rank where all our products have been developed and manufactured in-house. We have a strong manufacturing base in India today," he adds

RLS' has a three-legged strategy today which is to increase its scale, widen its products line and expand its geographical reach. Building a sustainable business will come through depth, which is tapping new geographies and diversity of products. Its biopharmaceuticals division, which accounts for 80 percent of the company's total business, has been and will continue to be the dominant part of its business. "Our strategy in biopharma area, is to develop a wide range of plasma proteins and biosim-12-18 months. MANCE HIGHLIGHTS

Maintained a CAGR of 52 percent growth.

Biopharma consititutes 80 percent of its business today. Has commercialized 7 biosimilar products in the market and has 20 more in the pipeline

EY STRATEGY INITIA

Expand into ROW markets either on its own or through partnering with distribu-tors. For Russia, CIS, China and the Latin American countries, RLS would explore partnerships. In China, partner ships would mainly be on the product opment and manufacturing front

RLS's UK-based subsidiary, Reliance GeneMedix, is focusing on develop-ing and marketing biosimilars in the European markets. The subsidiary is also looking at tapping bigger markets like Brazil, Russia and the Middle East for this product.

For Biopharma, strategy is to develop a large number of biosimilars and plasma proteins.

FUTURE PLANS

- To meet current demands, the company will look to hire another 100 employe
- Will look at partnerships for its mAbs

Looking at scaling up its pharma business to the same level as its biopharma
